The Written Work of David Bussell — Archive Structure

Final object of the total source-to-archive accounting audit

21 October 2026

Audit summary

Totals in = totals accounted. 2,255 source items were enumerated and each received exactly one status (0 unassigned, 0 double-assigned).

Total	**2255**	**652**	**1051**	**383**	**9**	**18**	**9**	**133**

- **Entries:** 652 (63 books, 589 pieces: Works 41 books / 124 pieces, 2,433,833 words; AI-Assisted Work 22 books / 465 pieces, 2,187,144 words). STANDALONE source items = 652 = entry count; every entry has exactly one canonical source.
- **Zero missing:** all 1703 standalone/enfolded written items have ≥95% of their normalized passages present in the archive (minimum 95.0%), apart from the passages removed at the author's request (below) and the Nine Devils monograph portion of *The Enfleshment Machine* post (cut as excluded commentary, below). 1645 are ≥95% inside their single target entry; 37 are multi-work compilations or combined manuscripts whose passages are present, once each, across 2–6 entries (listed in accounting.csv, column *also_in*).
- **Zero duplication:** passage-level check of every entry against every other entry (8-gram exact or 5-gram fuzzy, 40-word passages): **0 unapproved pairs ≥50%**, 0 pairs ≥80%. 24 further pairs share 30–49% (recurring poems and theory passages re-used across his books), listed in `lineage/audit_overlaps_30_50.csv`. No two entries share a title except the two distinct 2026-05-15 posts both titled *The Jungle* (different texts; a third same-titled post is catalogued under its subtitle).
- **Approved shared material (exception approved by David, 19 Oct 2026):** *THE TOTAL OPERATOR TEXT (MASTER DOC 1)* and *Theatre of the Chimera* share 50.5% of Total Operator's passages; *PHILOS* and *Keepers of the Hidden Flame* share 54.1% of PHILOS's passages. These are legitimate shared material between separate books, not duplicates: each is kept as its own book, the earlier merges were undone, and the pairs are recorded as APPROVED-SHARED in `lineage/audit_overlaps_30_50.csv`. *The World Soul* remains inside *The Journey of the Soul*.
- **AI reflections removed (19 Oct 2026, author request):** 102 AI-generated documents that reflect on, summarize, translate, clarify or interpret a text or his own work were removed from the AI-assisted sphere and are counted as commentary exclusions (`SPHERES/removed_reflections.csv`). Their former URLs redirect to the AI-assisted sphere.
- **American Mythology (19 Oct 2026):** the 454-page book *American Mythology: Orations on Baseball, History, and the Human Spirit* (2025-07-29) was added as a book; its 28 chapters held 28 former entries (27 Substack chapter posts and the *Cuba (1864-1908)* book with its 3 enfolded posts), which are now enfolded in it, with their 30 recordings attached at chapter level. Their former URLs redirect to the matching chapter. *(The Publication of) American Mythology* (an announcement) is a non-work exclusion.

- **Removed at the author's request (19 Oct 2026):** 5 AI-assisted entries (1 book, 4 pieces; 38,018 words; 9 source items incl. 4 enfolded in one of them) were removed whole, status EXCLUDED-AUTHOR-REQUEST; their former URLs redirect to the AI-Assisted Work index. In addition 22 passages (342 paragraphs, 34,051 words) were removed from five Absolute volumes (Vols XI–XV), together with the 10 contents-page lines (84 words) naming sections removed in full — 34,135 words in all; the rest of each volume is unchanged, and the word counts shown are net of the removal. Sources are untouched; the build excludes this material and the reconciliation accounts for every removed word (`SPHERES/women_exclusions.csv`, `SPHERES/women_redactions.json`).
- **AI-Assisted de-duplication and sorting (19 Oct 2026):** a passage-level pass over all 492 AI-Assisted entries (pieces vs pieces, pieces vs AI books, AI entries vs Works) with 8-/5-gram shingle containment plus sentence-level near-verbatim tracing found 13 pieces that were earlier drafts, condensations or retitled versions of a larger or later AI-Assisted entry (42.7–87.8% of their sentences traced in the container, 14–71% near-verbatim). They are enfolded in that container under an *Enfolded:* heading that carries every paragraph not already present; their former URLs redirect to that heading (`SPHERES/ai_dedup.csv`, 116 logged decisions; `lineage/ai_fold_redirects.csv`). No AI book duplicates another, nothing was folded into or out of the Works sphere, and *THE TOTAL OPERATOR TEXT* and *PHILOS* stay standalone (approved shared material). The AI-Assisted index is now arranged in 19 thematic sections (books first), chronological within each, with 27 series linked part-to-part; 59 titles were normalised for display (original titles kept) and 123 dates corrected from the UTC to the America/New_York publication date (`SPHERES/ai_groups.csv`).
- **Mac Downloads scan (19 Oct 2026):** ~/Downloads (2,961 document files; 294 traced passage by passage against the archive) held 10 works not in the archive; all were added whole, plus, at the author's request, his essay *The Cosmology of Vladimir Mayakovsky*:
  - **Works, human by the date rule (before 2025-11-10):** *De-civilizational Violence: Notes on a Modern Iconomachy* (book, 2024-01-04, 48 pp, 4 images); about a quarter of its passages are shared with *Aesthetic Theory* (cross-reference, no fold). Pieces: *Hornsby, Gehrig, Speaker: A Triptych of Transformation* (2025-01-08), *Playing With The Void* (2024-12-02), *The American Revolution in Art History* (2025-03-15) and *The Cosmology of Vladimir Mayakovsky* (2021-11-04, author request; about three quarters of it also appears in *Masks*, ABS-08, recorded as approved shared material, no fold).
  - **AI-Assisted Work**, by author decision (David, 19 Oct 2026: "All of them are ai except de civilizational violence"), recorded in `spheres.py` READ_DECISIONS. Five books: *The Adequate Man*, *The Ninth Artifact*, *The Third Body*, *Untitled: A Novel* and *The Secure Room* (play). One piece: *The Final Act: The Ledger of the Long Night*. All date from July–August 2026. A reading check and the fiction voice model (p(AI) 0.72–0.99) agree with the decision (`local/raw/downloads_scan/voice/VERDICTS.md`). The books are in the AI index's Books section; the piece is under Language, Literature & Composition.
  - **Additional passages appended** from older drafts (2026-04-05 Law of Being drafts, the 2025 *Algorithmic Code of Humanity*, *furnaceFIN*):
    - BK-LAW: Part V *Falsifiability Conditions*, 1,923 words;
    - BK-TECH: the opening sections of *The Algorithmic Code of Humanity*, 2,637 words;
    - ABS-05: 384 words.
  - **Excluded as commentary on his own works:** *The Arc and Ancestry of Bleu d'âme*, *The Book Dreams According to Your Laws* (on *Nine Devils*) and *The Weather of the Dead* (on *Sol White's Book of the Dead*).
  - **Not carried:** the César López letters in the June 2025 Cuba drafts (not his text), and four early, fully rewritten *Nine Devils* drafts (2026-07-19), which are lineage-only appearances of *The American Comedy*. Line-level edit residue in *Scroll of the Passion Play*, *Artimaeus* and *Soul-vale*, plus Substack page clutter, was skipped.
  - 25 source items were added: 11 canonical, 2 PDF exports, 1 identical copy, 8 draft variants and 3 commentary exclusions.
- **Full read of Works (19 Oct 2026):** the full reading of the Works sphere flagged 7 entries for a tool-assisted or chat-assistant register; each was re-read whole against his lecture and essay voice. One was moved to AI-Assisted Work, *Compressed Systems: An Ontology of Persistence Under Entropy* (2026-01-08): its abstract, maxims, bullet summaries and terminal proposition, 42% of the words and the whole frame, are assistant register. The other six stay in Works: *Baudelaire* (20% AI), *The World's Midnight* (~30%, lectures), *Geist* (~28%, lectures), *Material Shock Absorption* (ChatGPT is a subject, not a tool), *The Function of Revolutionary Art*, and *BK-TECH*, which predates 10 Nov 2025 although its section VIII is a pasted chatbot answer (`SPHERES/fullread_ai_review.csv`; that section was then moved out, see below). Entry URLs are unchanged.

- **Section VIII of BK-TECH moved to AI-Assisted Work (20 Oct 2026, author decision):** section VIII of *The Algorithmic Code of Humanity* (BK-TECH, listed as *Tech/Modernity + Ossawon Philosophy Unity*), *The Origins of Technological Code* (2,129 words), is a pasted chatbot answer on the 1909 E90-1 George Mullin card ("Let's walk through it clearly:", "This is the ghost of every JPEG"). It was cut from the book and is now its own AI-Assisted entry, dated with the book (2025-03-26), in the AI index's *Early Essays* section, with a note that it was originally section VIII of the book. Its id is the one the same text had as a 2025-03-26 Substack post (`P-the-origins-of-technological-code-e9c1aa62`); that address used to redirect to the book and is now the entry itself. The book keeps sections I–VII (no renumbering needed: VIII was the last numbered section of that part) and is 2,129 words shorter (45,694 → 43,565); the Substack post is now the new entry's STANDALONE source item instead of ENFOLDED in BK-TECH. Sources are untouched; the move is a sha1-checked patch applied at build time (`SPHERES/section_moves.json`, used by `ingest-lineage.mjs`, `spheres.py`, `reconcile.py`, `ai_groups_build.py`), and the reconciliation accounts for both sides word for word.
- **Final Substack completeness review (20 Oct 2026, approved by David):** every post on both Substacks was pulled back to the first one (davidbussellarchive.substack.com and david828085.substack.com) and traced against the live archive. Applied by `vault-site/scripts/apply_substack_final.py` from `SPHERES/substack_final_decisions.json` (idempotent):
  - **Four missing david828085 posts added to Works (human)** as standalone pieces, with their Substack source links, in his Dec 2025 shamanism / Jaguar Tree era: *The Reemergence of Pre-Linguistic Shamanism in Nietzsche and Fin de siecle Paris* (essay, 2025-12-05, 1,896 words; author confirmed it is his, text kept as published), *Shamanic Boundaries: The Face* (essay, 2025-12-05, 1,256 words), *Agony | Absalom | The Unvanquished* (poem, 2025-12-09, 939 words) and *The Dead* (poem, 2025-12-10, 406 words). Spheres: the poems in `sphere_common.LITERARY_PIECES`, the essays in `spheres.py` READ_DECISIONS.
  - **Two newly listed david828085 posts accounted as enfolded:** *Jaguar Tree | Leopard Spirit | Blood Stone | Bardo* in *Jaguar Tree / Bardo* (99.4%) and *The Olmec Werejaguar* in *Sol White's Book of the Dead* (100%; also in *Theatre of the Chimera*).
  - **Passages restored inline, in source order:** the ~410-word *Conclusion* of *The Mines Below | The Disjected* (which also covers the 116 words missing from *The Mills Below Everything*) and the *Closure* block of *First Principles* and the two Human Case definitions of *Theoretical Minimum* into *The Law of Being & The General Theory of Magnitude* (+676 words with the appendix below); section VIII *Consequences* of *The Law of Energetic Load and Spacetime Regulation* (closing statement renumbered IX, as in the post) and the heavy-elements sentences of *THE LAW OF BEING: The Unified Field…* into *The Law of Being: The Unified Field of Persistence…* (+248 words with the appendix below).
  - **Variants appended** (the entry already carries a revised version, so the Substack wording is kept in an *Additional passages / variants — from Substack (final review, 2026-10-20)* section rather than duplicated inline): the 133-word *First Principles* preface (General Theory of Magnitude); the *Meaning After Myth* sentence and the *Threshold Artifact Principle* gate and ontos sentences (Unified Field book); the *UFT: The Law of Being* sentence (*A Unified Field Theory of All Life…*, +105); the *Blue Vates* stanza (*THE TOTAL OPERATOR TEXT*, +89); the *Book 1* stanza and one *Sol White's Book of the Dead* line (*Sol White's Book of the Dead*, +156).
  - **Not restored, by decision:** the chat-assistant line in *The Threshold Artifact* ("Here is a clean, formal addendum you can drop directly after…") stays stripped; nothing under the women exclusions/redactions was restored.
  - **The Enfleshment Machine:** the text of *A Monograph on Nine Devils* (7,537 words; excluded as commentary on his own work) is cut from the book at build (`SPHERES/section_moves.json`, cut `ENFLESH-MONOGRAPH`); the entry is now 8,056 words (was 15,593) and its contents list no longer has the monograph's sections I–XIV.
  - The overlap of *The New Phase of This Unfolding Work* is left as is.
- **New lecture (21 Oct 2026, author request: "its my work. my speech."):** *The Consequences of Ontology: Persistence, Cosmological Being, and Radical Play (Lecture 10/21/26)*, his own transcript as published on Substack (2026-10-21, 5,002 words), added to Works as a standalone lecture with its YouTube recording (@DavidBussell–Lectures, `wuTfpYoRGF8`) embedded; no transcript was generated. Passage containment against the whole archive: 0.38% of its passages occur elsewhere (at most 0.12% in any one entry), so it is new text and nothing was folded. No material about women to exclude. Applied by `vault-site/scripts/add_new_lecture_2026_10_21.py`.
- **Integrity:** every enfolded item points to a live entry; no chains (former entries resolved to their final container); YouTube matched by metadata only (no transcript entries).
